INTERNSHIP EXPERIENCE

Full Stack Developer - [Techplement](#) - Remote Mar - Apr 2025

- Built Allin1Calculator - a multi-tool web app (finance, health, geometry) using Node.js and PostgreSQL with secure real-time calculations, bcrypt auth, session management, and OWASP-compliant input validation.
- Managed version-controlled development via GitHub PRs, code reviews, issue tracking, and Agile sprint releases within a team environment.

PROJECTS

AI Product Categorization & Proposal Engine

Node.js - Express - MongoDB - OpenAI API

[Repo](#)

- Modular Express backend using OpenAI API to auto-categorize eco-friendly products (primary/sub-categories, SEO tags, sustainability filters) and generate structured JSON business proposals from client type, goal, and budget.
- Clean MVC architecture with a dedicated prompt engineering layer; all AI prompts and responses persisted to MongoDB Atlas across three collections.

FinanceIQ - Personal Finance Dashboard

React 18 - Vite - Tailwind CSS - Recharts

[Live](#) | [Repo](#)

- Interactive dashboard with bar/donut charts, role-based UI (Admin/Viewer via React Context), derived insights engine (savings rate, top category, MoM diff), dark mode, localStorage persistence, and full mobile responsiveness.

Video Whisperer - YouTube Summarizer

React - Nhost - n8n - OpenRouter LLMs

[Repo](#)

- Extracts YouTube transcripts and summarises them via OpenRouter LLMs through n8n automated workflows; Nhost backend handles auth and storage with real-time processing.
